anatomica arbohydra arbohydra derivative motabolic cell	durante services of synanse assembly triation differentiation	ATP-dependent activity	-plus-end directed microfilament motor activity
cellular cell amino promosom ytoplasm	- maintenance of presynaptic active zone structure - lysine biosynthetic process via aminoadipic acid - ammonia assimilation cycle - tyrosine biosynthetic process, by oxidation of phenylalanine - sarcosine catabolic process - negative regulation of maintenance of mitotic sister chromatid cohesion, telomeric - positive regulation of cytoplasmic translation - negative regulation of cytoplasmic translational initiation in response to stress	catalytic activity	Averopase activity The property of the proper
DNA DNA A-1	error–free translesion synthesis interstrand cross–link repair double–strand break repair replication fork processing replication fork reversal positive regulation of transcription from RNA polymerase II promoter in response to calcium ion mRNA transcription transcription elongation by RNA polymerase II promoter negative regulation of post–transcriptional gene silencing by RNA	cytoskeletal protein binding	-tubulin binding -spectrin binding
lipid	regulation of dendritic cell cytokine production response to type I interferon positive regulation of macrophage cytokine production positive regulation of leukocyte migration positive regulation of retinoic acid biosynthetic process retinoic acid biosynthetic process 3-keto-sphinganine metabolic process platelet activating factor metabolic process qlycine receptor clustering ruclear inner membrane organization negative regulation of mitochondrial membrane permeability inner mitochondrial membrane organization positive regulation of enguliment of apoptotic cell 0.04	binding lipid nted_pvalue	-triacyl lipopeptide binding -diacyl lipopeptide binding over_represented_pv
ondrit matabalia evetam malacula eoc	mitochondrial genome maintenance onumber of the process of the pr	molecular function regulator activity	phosphatase regulator activity
ytoplas rogramme protein protein F	protein import into nucleus negative regulation of apoptotic process in bone marrow cell regulation of ER-associated ubiquitin-dependent protein catabolic process 'de novo' protein folding	RNA binding	-poly-pyrimidine tract binding -pre-mRNA intronic binding -mRNA binding -U6 snRNA binding
orotein snRNA snRNA snRNA	historie H3 - K4 frime hylation to protein activation by protein phosphorylation by the protein phosphorylation regulation of oviposition regulation of oviposition	transporter activity	-water transmembrane transporter activity -proton channel activity -bicarbonate transmembrane transporter activity -active borate transmembrane transporter activity -NAADP-sensitive calcium-release channel activity -cation:chloride symporter activity -solute:inorganic anion antiporter activity
telomere	telomere maintenance		-nucleic acid binding -zinc ion binding -heterocyclic compound binding -organic cyclic compound binding -catalytic activity -DNA binding
